Chesapeake Center for Student Success views all of our students as being valuable. One of our goals is to provide as many resources as possible to assist them in both their educational and career pursuits.

For a number of years, we have been fortunate to have an Art Therapy Program on our campus. Each semester we have an intern that works with our students. Art Therapy is designed to assist those individuals who have difficulty expressing feelings or concerns. Therefore, the intern can assist students to come to their own understanding of what the art created by them means. We need to have your permission to offer this program to your child should he/she desire to participate.

_____ Yes, my child **may** participate in Art Therapy

_____ No, my child **may not** participate in Art therapy
