Drug list
Our drug list (sometimes called a formulary) is a list of prescription drugs covered by your plan. It’s made up of hundreds of brand and generic drugs. We research drugs and select ones that are safe, work well and offer the best value. That’s because we think it’s important to cover drugs that help people stay healthy so they can work, go to school, and continue the activities of a busy life.

Sometimes we update the Drug List if new drugs come to market, or if new research becomes available. To view the current list, visit anthem.com. Click on “Customer Care” in the top-right corner. Select your state, and then click “Download Forms.” You’ll find the Drug List on this page.
If you don’t have access to a computer, you can check the status of a drug by calling Customer Service at the phone number on your plan ID card.

**Generic drugs**
If you’re taking a brand name drug, you could save money by switching to an effective, lower cost generic drug. Your plan covers both brand and generic (or non-brand) drugs. When you choose a generic, you’ll get the effectiveness of a brand drug – but usually at a lower cost. Brand and generic drugs have the same active ingredient, strength and dose. And generics must meet the same high standards for safety, quality and purity.

Prescription drugs will always be dispensed as ordered by your physician. If you or your doctor requests a brand name drug when a generic is available, you will pay your usual copayment for the generic drug plus the difference in the allowable charge between the generic and brand name drug.

**Why generics cost less**
Developing a new drug is expensive. When a company creates a new drug, it gets a patent for up to 20 years. That means only the company that created it can sell it during that time. Once the patent expires, other companies can make copies of the same drug. These companies avoid the high costs of developing the drug – and that helps lower the price for you.

Talk to your doctor to see if a generic is right for you. Don’t switch or stop taking any drugs until you talk to your doctor.

**Prior authorization**
Most prescriptions are filled right away when you take them to the pharmacy. But, some drugs need our review and approval before they’re covered. This process is called prior authorization. It focuses on drugs that may have:

- Risk of serious side effects
- High potential for incorrect use or abuse
- Better options that may cost you less
- Rules for use with very specific conditions

If your drug needs approval, your pharmacist will let you know. To check in advance, call the Customer Service phone number on your ID plan card.

The Drug List also includes this information. To view it, visit anthem.com, click on “Customer Care” in the top-right corner. Select your state, then click on “Download Forms.” You’ll find the Drug List on this page.
