Recommended Supply List for Chesapeake Online

While each student’s home school will provide specific need related to this supply list, there are some additional items parents may consider purchasing for their child. Having a dedicated space that is comfortable, free from distractions, organized, and equipped with the appropriate furniture (chair and desk) creates an environment conducive to learning. Since students in Chesapeake Online should expect to put in the same amount of time completing work as they would in a traditional on- campus course, it is essential for students to develop routines and have access to tools that will allow them to complete work efficiently. Supplies listed below are **optional**, but are recommended for student success.
